WeedEnder® Stake Installation Just Got Easier!

UTECK's WeedEnder® line has added an excellent time saving tool for use in conjunction with our WeedEnder® material. The Quick Hook Stake Driver is designed to cut installation by 80%!

the ground and through the WeedEnder® material by hand. This is especially effective if you are installing miles of WeedEnder® under new or existing guardrail. With our Quick-Hook Stake Driver you have just the right amount of driving power you need, every installation.

Constructed of 16 gauge steel, the Quick-Hook Stake Driver features a 3/4" driving rod made of hardened cold roll steel and is machined to fit any standard air hammer. Two nylon bushings ensure a smooth glide. A light push down while squeezing the trigger on the air hammer is all you need to activate the driver. Once the stake has been fully inserted simply release the air

Features:

- Significantly reduces installation time
- Can be used in a variety of soil conditions
- Reduces labor required for installation
- Reduces fatigue

We have had excellent results installing WeedEnder® in the past by manually inserting each hook stake with elbow grease and a hammer. While this is still a very good method of installation we are always looking for better and quicker ways of installation. U-TECK has come up with a faster way to insert the WeedEnder® hook stakes by creating a custom-made, pneumatic powered tool specifically for this purpose. Introducing the NEW! Quick-Hook Stake Driver!

The Quick-Hook Stake Driver provides pneumatic driving of our custom WeedEnder® hook stakes to minimize the time required to drive the hook stakes into

**The Quick-Hook Stake Driver is 4X
Faster Than Manual Staking!**

hammer trigger and pull it back up to the original starting position and a new Hook Stake will automatically index into the ready position. The driver holds a maximum of one cartridge at a time. We offer 30 stakes per cartridge, and 120 stakes per box. (Standard, loose stakes may not be used in the stake driver, only stakes in cartridge form).

We, at U-TECK, know your time is money so we are constantly searching for new ways to help you, our customer, perform your jobs more quickly and efficiently without cutting corners on quality or user safety. The Quick Hook Stake Driver is a custom-made, pneumatic powered tool specifically designed for this purpose.
